1 Konjunktív és diszjunktív logikai kapcsolatok

1.1 Egyszerűbb írásmód: De Morgan's Laws

| m_i^n | i | j | $\overline{M_j^n}$ |
|-----------------------------------|----------|----------|---|
| $A * B * C$ | 7 | 0 | $\overline{\overline{A + \overline{B + \overline{C}}}}$ |
| $\overline{A} * B * \overline{C}$ | 2 | 5 | $\overline{A + \overline{B + C}}$ |
| $A * \overline{B} * C$ | 5 | 2 | $\overline{\overline{A + B + \overline{C}}}$ |

This is the sum of all the minterms of F^4 .

$$F^4 = \sum^4 (0, 2, 3, 4, 5, 11, 15)$$

$F^4 = ABCD$ 7 times

$$F^4 = (\overline{A} + \overline{B} + \overline{C} + \overline{D}) \cdot (\overline{A} + \overline{B} + C + \overline{D}) \cdot (\overline{A} + \overline{B} + C + D) \cdot (\overline{A} + B + \overline{C} + \overline{D}) \\ \cdot (\overline{A} + B + \overline{C} + D) \cdot (\overline{A} + B + C + \overline{D}) \cdot (A + B + C + D)$$

2 Egyszerűsítés

Logikai függvények egyszerűsítése! Logikai algebra. Szabályai és alkalmazásuk:

2.1 Kommutatív szabály

$$A + B = B + A$$

$$A \cdot B = B \cdot A$$

2.2 Disztributív szabály

$$A \cdot (B + C) = A \cdot B + A \cdot C$$

$$A + (B \cdot C) = (A + B) \cdot (A + C)$$

2.3 A logikai algebra alapszabályai

$$\begin{array}{lll}
 A \cdot \emptyset = \emptyset & A \cdot A = A & \emptyset \cdot \emptyset = \emptyset \\
 A + \emptyset = A & A + A = A & \emptyset + \emptyset = \emptyset \\
 A \cdot 1 = A & A + 1 = 1 & 1 \cdot 1 = 1 \\
 A + 1 = 1 & A \cdot 1 = A & 1 + 1 = 1
 \end{array}$$

2.4 De Morgan szabály

$$\overline{A \cdot B} = \overline{A} + \overline{B}$$

$$\overline{A + B} = \overline{A} \cdot \overline{B}$$

Igazságtábla:

| A | B | $A \cdot B$ | $\overline{A + B}$ |
|---|---|-------------|--------------------|
| 0 | 0 | 1 | 1 |
| 0 | 1 | 1 | 1 |
| 1 | 0 | 1 | 1 |
| 1 | 1 | 0 | 0 |

De Morgan szabály megfordítja a logikai műveleteket a negációval.

2.5 XOR és XNOR

$$A \oplus B = \overline{A} \cdot B + A \cdot \overline{B}$$

$$A \odot B = \overline{A} \cdot \overline{B} + A \cdot B$$

2.6 Gyakorlás

$$A \oplus B = \overline{A \odot B}$$

$$\overline{A} \cdot B + A \cdot \overline{B} = \overline{A} \cdot \overline{B} + A \cdot B$$

$$\overline{A} \cdot B + A \cdot \overline{B} = (A + B) \cdot (\overline{A} + \overline{B})$$

$$\overline{A} \cdot B + A \cdot \overline{B} = A \cdot \overline{A} + A \cdot \overline{B} + \overline{B} \cdot \overline{A} + B \cdot \overline{B}$$

$$\overline{A} \cdot B + A \cdot \overline{B} = A \cdot \overline{B} + B \cdot \overline{A}$$
